Ovid[®]

Ovid is the industry's leading medical and health science research and information discovery platform—providing a best-in-class solution of search, discovery, and management technology functionality for seamless access to over 8,000 premium online journals, books, and databases from many of the world's premier publishers and professional and academic societies.

A Mix of Digital Products to Support Healthcare Teaching, Learning, and Practice

Resources available on the Ovid platform

Ovid Nursing Full-Text Plus

Combines over 50 Lippincott nursing and allied health journals with two bibliographic databases, including the Ovid Emcare Database. Journals include research and practitioner-oriented publications, with articles dating back to 1995. Ovid Emcare features more than 5 million records from nearly 4,000 indexed, unembargoed journals; 1,800 journals are not indexed in any other database. Plus, an additional 375,000 records from more than 400 journals—22,000 articles!

Bates' Visual Guide to Physical Examination

This collection of 7 hours of video clips demonstrates core physical assessment techniques on a diverse set of patient types, and helps viewers prepare for MD, DO, Physician Assistant, and Nurse Practitioner certification exams as well as the Objective Structured Clinical Examinations (OSCE). Videos can be linked from a library or syllabus, and they're organized by exam type; OSCE-style modules replicate closely the format of the actual board exams.

Acland's Video Atlas

Bring human anatomy to life with this package of over 300 3D rotational gross anatomy videos, produced and narrated by a leading anatomist. Ideal for faculty and students in gross anatomy courses or in lab settings with dissection training, as part of a medical, nursing, dental, or PA curriculum. Each 2-5 minute video depicts cadaver specimens being manipulated to illustrate real movement of bone, muscle, and tissue. Great for surgical residents, too!

JBI Evidence-Based Practice Database

From the Joanna Briggs Institute (JBI), one of the world's foremost producers of evidence-based methodologies and tools for reviewing, analyzing, and applying research evidence in medicine and healthcare. The database features over 5,000 content resources—evidence summaries, guidance sheets on applying evidence in practice, and more—covering 20 high-priority medical specialties. Resources have been analyzed and appraised by global expert reviewers for their quality, relevance, and currency.

Visible Body[®] Human Anatomy Atlas 2021

Designed for regional and systemic anatomy study and review, thousands of interactive 3D anatomical structures and animations brings anatomy to life. Users dissect, rotate, zoom in, draw on, and annotate anatomical models—illuminating the movement of tissue, organs, muscle, bone, and tendons—and share created content with classmates and colleagues. Many core physiological processes are also depicted. .

LWW Health Library: Made Incredibly Easy Collection

Like other Health Libraries, this collection combines leading eBooks—here, 30 titles from the *Made Incredibly Easy!* series—video and audio files, self-assessment questions, and case studies, all accessible via a single online portal. Perfect for students in an RN or BSN curriculum better understand fundamental procedures and clinical concepts, and prepare for certification exams and professional clinical practice. Nursing care plans and chapter games are also included.
