

# DDC 23 Summaries

## History and Current Use

The Dewey Decimal Classification (DDC) system is a general knowledge organization tool that is continuously revised to keep pace with knowledge. The system was conceived by Melvil Dewey in 1873 and first published in 1876. The DDC is published by OCLC Online Computer Library Center, Inc. OCLC owns all copyright rights in the Dewey Decimal Classification, and licenses the system for a variety of uses.

The DDC is the most widely used classification system in the world. Libraries in more than 140 countries use the DDC to organize and provide access to their collections, and DDC numbers are featured in the national bibliographies of more than 60 countries. Libraries of every type apply Dewey numbers on a daily basis and share these numbers through a variety of means (including WorldCat, the OCLC Online Union Catalog). Dewey is also used for other purposes, e.g., as a browsing mechanism for resources on the web.

The DDC has been translated into over thirty languages. Translations of the latest edition of the DDC are completed, planned, or underway in Arabic, French, German, Italian, Norwegian, Spanish, Swedish, and Vietnamese.

## Development

One of Dewey's great strengths is that the system is developed and maintained in a national bibliographic agency, the Library of Congress. The Dewey editorial office is located in the Decimal Classification Division of the Library of Congress, where classification specialists annually assign tens of thousands of DDC numbers to records for works cataloged by the Library. Having the editorial office within the CIP and Dewey Section enables the editors to detect trends in the literature that must be incorporated into the Classification. The editors prepare proposed schedule revisions and expansions, and forward the proposals to the Decimal Classification Editorial Policy Committee (EPC) for review and recommended action.

EPC is a ten-member international board whose main function is to advise the editors and OCLC on matters relating to changes, innovations, and the general development of the Classification. EPC represents the interests of DDC users; its members come from national, public, special, and academic libraries, and from library schools.

## **Editions**

The DDC is published in full and abridged editions in print and web accessible versions. The abridged edition is a logical truncation of the notational and structural hierarchy of the corresponding full edition on which it is based, and is intended for general collections of 20,000 titles or less. WebDewey, the electronic version of the classification is updated frequently and contain additional index entries and mapped vocabulary. Currently, the Abridged 15 edition is available to WebDewey subscribers in pdf form. Abridged numbers are indicated with segmentation marked. The electronic version and supplemental web postings are the chief sources of ongoing updates to the DDC. On the Dewey web site ([www.oclc.org/dewey](http://www.oclc.org/dewey)), selected new numbers and changes to the DDC are posted regularly.

## **Structure and Notation**

The DDC is built on sound principles that make it ideal as a general knowledge organization tool: meaningful notation in universally recognized Arabic numerals, well-defined categories, well-developed hierarchies, and a rich network of relationships among topics. In the DDC, basic classes are organized by disciplines or fields of study. At the broadest level, the DDC is divided into ten main classes, which together cover the entire world of knowledge. Each main class is further divided into ten divisions, and each division into ten sections (not all the numbers for the divisions and sections have been used). The main structure of the DDC is presented in the DDC Summaries following this introduction. The headings associated with the numbers in the summaries have been edited for browsing purposes, and do not necessarily match the complete headings found in the schedules.

The *first summary* contains the ten main classes. The first digit in each three-digit number represents the main class. For example, 600 represents technology.

The *second summary* contains the hundred divisions. The second digit in each three-digit number indicates the division. For example, 600 is used for general works on technology, 610 for medicine and health, 620 for engineering, 630 for agriculture.

The *third summary* contains the thousand sections. The third digit in each three-digit number indicates the section. Thus, 610 is used for general works on medicine and health, 611 for human anatomy, 612 for human physiology, 613 for personal health and safety.

Arabic numerals are used to represent each class in the DDC. A decimal point follows the third digit in a class number, after which division by ten continues to the specific degree of classification needed.

A subject may appear in more than one discipline. For example, “clothing” has aspects that fall under several disciplines. The psychological influence of clothing belongs in 155.95 as part of the discipline of psychology; customs associated with clothing belong in 391 as part of the discipline of customs; and clothing in the sense of fashion design belongs in 746.92 as part of the discipline of the arts.

## **Hierarchy**

Hierarchy in the DDC is expressed through structure and notation. Structural hierarchy means that all topics (aside from the ten main classes) are part of all the broader topics above them. Any note regarding the nature of a class holds true for all the subordinate classes, including logically subordinate topics classed at coordinate numbers.

Notational hierarchy is expressed by length of notation. Numbers at any given level are usually subordinate to a class whose notation is one digit shorter; coordinate with a class whose notation has the same number of significant digits; and superordinate to a class with numbers one or more digits longer. The underlined digits in the following example demonstrate this notational hierarchy:

600 Technology  
630 Agriculture and related technologies  
636 Animal husbandry  
636.7 Dogs  
636.8 Cats

“Dogs” and “Cats” are more specific than (i.e., are subordinate to) “Animal husbandry”; they are equally specific as (i.e., are coordinate with) each other; and “Animal husbandry” is less specific than (i.e., is superordinate to) “Dogs” and “Cats.”

Sometimes, other devices must be used to express the hierarchy when it is not possible or desirable to do so through the notation. Special headings, notes, and entries indicate relationships among topics that violate notational hierarchy.

## **Arrangement of the DDC**

The print version of the latest full edition of the DDC, Edition 23, is composed of the following major parts in four volumes:

### **Volume 1**

- (A) Introduction: A description of the DDC and how to use it
- (B) Glossary: Short definitions of terms used in the DDC
- (C) Index to the Introduction and Glossary
- (D) Manual: A guide to the use of the DDC that is made up primarily of extended discussions of problem areas in the application of the DDC. Information in the Manual is arranged by the numbers in the tables and schedules.
- (E) Tables: Six numbered tables of notation that can be added to class numbers to provide greater specificity

### **Volume 2**

- (F) Schedules: The organization of knowledge from 000–599

### **Volume 3**

- (G) Schedules: The organization of knowledge from 600–999

### **Volume 4**

- (H) Relative Index: An alphabetical list of subjects with the disciplines in which they are treated subarranged alphabetically under each entry

## **Entries**

Entries in the schedules and tables are composed of a DDC number in the number column (the column at the left margin), a heading describing the class that the number

represents, and often one or more notes. All entries (numbers, headings, and notes) should be read in the context of the hierarchy.

In the print version of the DDC, the first three digits of schedule numbers (main classes, divisions, sections) appear only once in the number column, when first used. They are repeated at the top of each page where their subdivisions continue. Subordinate numbers appear in the number column, beginning with a decimal point, with the initial three digits understood.

Some numbers in the schedules and tables are enclosed in parentheses or square brackets. Numbers and notes in parentheses provide options to standard practice. Numbers in square brackets represent topics that have been relocated or discontinued, or are unassigned. Square brackets are also used for standard subdivision concepts that are represented in another location. Numbers in square brackets are never used.

### **Number Building**

Only a fraction of potential DDC numbers are included in the schedules. It is often necessary to build or synthesize a number that is not specifically listed in the schedules. Such built numbers allow for greater depth of content analysis. There are four sources of notation for building numbers: (A) Table 1 Standard Subdivisions; (B) Tables 2–6; (C) other parts of the schedules; and (D) add tables in the schedules.

Number building is initiated only upon instructions in the schedules (except for the addition of standard subdivisions, which may take place anywhere unless there is an instruction to the contrary). Number building begins with a base number (always stated in the instruction note) to which another number is added.

### **More Information**

The Dewey web site ([www.oclc.org/dewey](http://www.oclc.org/dewey)) contains up-to-date information about the DDC, DDC products and services, and DDC licensing. For more information about the structure and application of the Dewey Decimal Classification, consult the Introduction. A more in-depth introduction to the Dewey Decimal Classification may be found on the Dewey Teaching Site at <http://oclc.org/deweyteachingsite>

# DDC 23 Summaries

## Main Classes

000	Computer science, information & general works
100	Philosophy & psychology
200	Religion
300	Social sciences
400	Language
500	Science
600	Technology
700	Arts & recreation
800	Literature
900	History & geography

# Second Summary

## Hundred Divisions

000	Computer science, knowledge & systems	500	Science
010	Bibliographies	510	Mathematics
020	Library & information sciences	520	Astronomy
030	Encyclopedias & books of facts	530	Physics
040	[Unassigned]	540	Chemistry
050	Magazines, journals & serials	550	Earth sciences & geology
060	Associations, organizations & museums	560	Fossils & prehistoric life
070	News media, journalism & publishing	570	Biology
080	Quotations	580	Plants (Botany)
090	Manuscripts & rare books	590	Animals (Zoology)
100	Philosophy	600	Technology
110	Metaphysics	610	Medicine & health
120	Epistemology	620	Engineering
130	Parapsychology & occultism	630	Agriculture
140	Philosophical schools of thought	640	Home & family management
150	Psychology	650	Management & public relations
160	Philosophical logic	660	Chemical engineering
170	Ethics	670	Manufacturing
180	Ancient, medieval & eastern philosophy	680	Manufacture for specific uses
190	Modern western philosophy	690	Construction of buildings
200	Religion	700	Arts
210	Philosophy & theory of religion	710	Area planning & landscape architecture
220	The Bible	720	Architecture
230	Christianity	730	Sculpture, ceramics & metalwork
240	Christian practice & observance	740	Graphic arts & decorative arts
250	Christian pastoral practice & religious orders	750	Painting
260	Christian organization, social work & worship	760	Printmaking & prints

041	[Unassigned]	091	Manuscripts
042	[Unassigned]	092	Block books
043	[Unassigned]	093	Incunabula
044	[Unassigned]	094	Printed books
045	[Unassigned]	095	Books notable for bindings
046	[Unassigned]	096	Books notable for illustrations and materials
047	[Unassigned]	097	Books notable for ownership or origin
048	[Unassigned]	098	Prohibited works, forgeries, hoaxes
049	[Unassigned]	099	Books notable for format

100	Philosophy & psychology	150	Psychology
101	Theory of philosophy	151	[Unassigned]
102	Miscellany of philosophy	152	Perception, movement, emotions & drives
103	Dictionaries & encyclopedias	153	Conscious mental processes & intelligence
104	[Unassigned]	154	Subconscious & altered states
105	Serial publications of philosophy	155	Differential & developmental psychology
106	Organizations & management	156	Comparative psychology
107	Education, research & related topics	157	[Unassigned]
108	Groups of people	158	Applied psychology
109	History and collected biography	159	[Unassigned]
110	Metaphysics	160	Philosophical logic
111	Ontology	161	Induction
112	[Unassigned]	162	Deduction
113	Cosmology (Philosophy of nature)	163	[Unassigned]
114	Space	164	[Unassigned]
115	Time	165	Fallacies and sources of error
116	Change	166	Syllogisms
117	Structure	167	Hypotheses
118	Force and energy	168	Argument and persuasion
119	Number and quantity	169	Analogy
120	Epistemology, causation, humankind	170	Ethics (Moral philosophy)
121	Epistemology (Theory of knowledge)	171	Ethical systems
122	Causation	172	Political ethics
123	Determinism and indeterminism	173	Ethics of family relationships
124	Teleology	174	Occupational ethics
125	[Unassigned]	175	Ethics of recreation & leisure
126	The self	176	Ethics of sex and reproduction
127	The unconscious and the subconscious	177	Ethics of social relations
128	Humankind	178	Ethics of consumption
129	Origin and destiny of individual souls	179	Other ethical norms
130	Parapsychology and occultism	180	Ancient, medieval, eastern philosophy
131	Parapsychological and occult methods	181	Eastern philosophy
132	[Unassigned]	182	Pre-Socratic Greek philosophies
133	Specific topics in parapsychology & occultism	183	Sophistic, Socratic, related philosophies
134	[Unassigned]	184	Platonic philosophy
135	Dreams and mysteries	185	Aristotelian philosophy
136	[Unassigned]	186	Skeptic and Neoplatonic philosophies
137	Divinatory graphology	187	Epicurean philosophy
138	Physiognomy	188	Stoic philosophy
139	Phrenology	189	Medieval western philosophy
140	Specific philosophical schools	190	Modern western philosophy
141	Idealism and related systems	191	Philosophy of United States and Canada
142	Critical philosophy	192	Philosophy of British Isles
143	Bergsonism and intuitionism	193	Philosophy of Germany and Austria
144	Humanism and related systems	194	Philosophy of France
145	Sensationalism	195	Philosophy of Italy
146	Naturalism and related systems	196	Philosophy of Spain and Portugal
147	Pantheism and related systems	197	Philosophy of Russia
148	Dogmatism, eclecticism, liberalism, etc.	198	Philosophy of Scandinavia and Finland
149	Other philosophical systems and doctrines	199	Philosophy of other geographic areas

200	Religion	250	Local Christian church and religious orders
201	Religious mythology & social theology	251	Preaching (Homiletics)
202	Doctrines	252	Texts of sermons
203	Public worship and other practices	253	Pastoral work (Pastoral theology)
204	Religious experience, life, practice	254	Local church administration
205	Religious ethics	255	Religious congregations and orders
206	Leaders and organization	256	[Unassigned]
207	Missions and religious education	257	[Unassigned]
208	Sources	258	[Unassigned]
209	Sects and reform movements	259	Pastoral care of families & kinds of persons
210	Philosophy and theory of religion	260	Christian social and ecclesiastical theology
211	Concepts of God	261	Social theology and interreligious relations
212	Existence, knowability & attributes of God	262	Ecclesiology
